1. Claims 1-34 are presented for examination.
2. The following is a quotation of 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 22-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claim "In a computer system on which one or more applications execute, a computer readable medium comprising instructions" raises a question as to whether the subject matter is new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement. Examiner suggests applicant replaces with "In a computer system on which one or more applications execute, a computer readable storage medium comprising instructions" to overcome the 35 U.S.C. 101 rejection.
